

The Jump TOC

- The number of radio nets you wish to monitor and a seat for each person will drive the number of vehicles you need for your Jump TOC
- Each BOS should be represented in your JTOC so C2 and predictive analysis can be provided to the commander while the Main TOC is displacing forward
- To be most effective, each member of the JTOC should bring his tools with him: (map board, graphics, collection matrix, event template, target list...)
- Ensure battle hand-over from the TOC and JTOC is clearly announced so everyone knows who is controlling the battle and never move the JTOC and TOC at the same time
